Data protection

- Customer data hosted in U.S. regions only (primary and disaster-recovery regions in separate geographies)
- Logical tenant isolation with per-customer encryption keys
- Read-only connectors by default; write-back is opt-in per integration
- Configurable data retention, from 90 days to 7 years, with verified deletion on request

Identity and access

- SSO via SAML 2.0 or OIDC (Okta, Microsoft Entra ID, Google Workspace)
- SCIM user provisioning and deprovisioning
- Role-based access down to site, plant, or region
- MFA enforced for all Ridgeline personnel with production access

Operations and resilience
